

# NICE CLASSIFICATION - 10<sup>th</sup> Edition, Version 2016

## Class 1

Chemicals used in industry, science and photography, as well as in agriculture, horticulture and forestry; unprocessed artificial resins, unprocessed plastics; manures; fire extinguishing compositions; tempering and soldering preparations; chemical substances for preserving foodstuffs; tanning substances; adhesives used in industry.

### Explanatory Note

Class 1 includes mainly chemical products used in industry, science and agriculture, including those which go to the making of products belonging to other classes.

This Class includes, in particular:

- compost;
- salt for preserving other than for foodstuffs;
- certain additives for the food industry (consult the Alphabetical List of Goods).

This Class does not include, in particular:

- raw natural resins (Cl. 2);
- chemical products for use in medical science (Cl. 5);
- fungicides, herbicides and preparations for destroying vermin (Cl. 5);
- adhesives for stationery or household purposes (Cl. 16);
- salt for preserving foodstuffs (Cl. 30);
- straw mulch (Cl. 31).

Basic no.	Indication
010008	<b>acetate</b> of cellulose, unprocessed
010007	<b>acetates</b> [chemicals]*

## Class 7

Machines and machine tools; motors and engines (except for land vehicles); machine coupling and transmission components (except for land vehicles); agricultural implements other than hand-operated; incubators for eggs; automatic vending machines.

### Explanatory Note

Class 7 includes mainly machines, machine tools, motors and engines.

This Class includes, in particular:

- parts of motors and engines (of all kinds);
- electric cleaning machines and apparatus.

This Class does not include, in particular:

- certain special machines and machine tools (consult the Alphabetical List of Goods);
- hand tools and implements, hand-operated (Cl. 8);
- motors and engines for land vehicles (Cl. 12).

## Class 9

Scientific, nautical, surveying, photographic, cinematographic, optical, weighing, measuring, signalling, checking (supervision), life-saving and teaching apparatus and instruments; apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling electricity; apparatus for recording, transmission or reproduction of sound or images; magnetic data carriers, recording discs; compact discs, DVDs and other digital recording media; mechanisms for coin-operated apparatus; cash registers, calculating machines, data processing equipment, computers; computer software; fire-extinguishing apparatus.

### Explanatory Note

This Class includes, in particular:

- apparatus and instruments for scientific research in laboratories;
- apparatus and instruments for controlling ships, such as apparatus and instruments for measuring and for transmitting orders;
- protractors;
- punched card office machines;
- all computer programs and software regardless of recording media or means of dissemination, that is, software recorded on magnetic media or downloaded from a remote computer network.

This Class does not include, in particular:

- the following electrical apparatus and instruments:
  1. electromechanical apparatus for the kitchen (grinders and mixers for foodstuffs, fruit presses, electrical coffee mills, etc.), and certain other apparatus and instruments driven by an electrical motor, all coming under Class 7;
  2. apparatus for pumping or dispensing fuels (Cl. 7);
  3. electric razors, clippers (hand instruments) and flat irons (Cl. 8);
  4. electrical apparatus for space heating or for the heating of liquids, for cooking, ventilating, etc. (Cl. 11);
  5. electric toothbrushes and combs (Cl. 21);
- clocks and watches and other chronometric instruments (Cl. 14);
- control clocks (Cl. 14);
- amusement and game apparatus adapted for use with an external display screen or monitor (Cl. 28).

Unprocessed and semi-processed rubber, gutta-percha, gum, asbestos, mica and substitutes for all these materials; plastics in extruded form for use in manufacture; packing, stopping and insulating materials; flexible pipes, not of metal.

#### Explanatory Note

Class 17 includes mainly electrical, thermal and acoustic insulating materials and plastics, being for use in manufacture in the form of sheets, blocks and rods, and goods made of the materials in this class.

This Class includes, in particular:

- rubber material for recapping tyres;
- padding and stuffing materials of rubber or plastics;
- floating anti-pollution barriers.

This Class does not include, in particular:

- certain goods made of the materials in this class that are classified according to their function or purpose (consult the Alphabetical List of Goods).

## Class 40

Treatment of materials.

### Explanatory Note

Class 40 includes mainly services not included in other classes, rendered by the mechanical or chemical processing, transformation or production of objects or inorganic or organic substances, including custom manufacturing services. For the purposes of classification, the production or manufacturing of goods is considered a service only in cases where it is effected for the account of another person to their order and specification. If the production or manufacturing is not being performed to fulfil an order for goods which meet the customer's particular needs, requirements, or specifications, then it is generally ancillary to the maker's primary commercial activity or goods in trade. If the substance or object is marketed to third parties by the person who processed, transformed or produced it, then this would generally not be considered a service.

This Class includes, in particular:

- services relating to transformation of an object or substance and any process involving a change in its essential properties (for example, dyeing a garment); consequently, a maintenance service, although usually in Class 37, is included in Class 40 if it entails such a change (for example, the chroming of motor vehicle bumpers);
- services of material treatment which may be present during the production of any substance or object other than a building; for example, services which involve cutting, shaping, polishing by abrasion or metal coating;
- the custom manufacturing of goods to the order and specification of others (bearing in mind that certain offices require that the goods produced be indicated), for example, custom manufacturing of automobiles.

This Class does not include, in particular:

- repair services (Cl. 37);
- certain customization services, for example, the custom painting of automobiles (Cl. 37).
